The Next Opportunity for Sustainable Business: **Making Global Goals Local Business**

United Nations
Global Compact

The newly adopted Sustainable Development Goals (SDGs) and the Paris Climate Agreement have shaped a new era for business. The UN Global Compact is taking the lead on turning these political agreements into drivers for more responsible and sustainable business. Join us in our spring activities focused on the potential of making global goals local business.

In 2016, the UN Global Compact will launch a series of activities engaging and inspiring companies globally to use the 17 SDGs as business drivers.

The mission is to translate the SDGs into new business models, products and services that will help to meet the vision of these new global goals: a fairer, greener and more prosperous world.

By mobilizing our 13,000+ participants and our 85 local networks on the ground, we will activate our global movement to take local action. Global Compact Local Networks will host local workshops and conferences with the aim of unlocking the potential of the global goals for creating responsible local business opportunities.

Another SDG activity in 2016 will be our campaign to identify the entrepreneurs, innovators and thought-leaders from around the world who exemplify business as a force for good.

The most inspiring SDG champions will be recognized at the 2016 UN Global Compact Leaders Summit in June. Here, we will gather chief executives with leaders from civil society, government and the UN to celebrate and be inspired by companies, innovators and projects from all over the world that are advancing the global sustainability goals.

For more information on our SDG activities, please contact Chief for Leadership Programmes Ole Hansen at: hansen4@unglobalcompact.org.
