

# Country Consultations

## Action Platform for Peace, Justice and Strong Institutions

### Overview of the Country Consultations

From January to June 2020, the UN Global Compact Action Platform for Peace, Justice and Strong Institutions will host full-day Consultation Workshops across all regions of the world, bringing together private sector, UN agencies, Governments and civil society to inform the development of the *Understand, Implement, Report Framework* (working title), the global standard for business engagement on Goal 16.

By convening business stakeholders and others together to discuss their understanding of the targets of Goal 16, and examples of implementation at the national level, the Action Platform will provide outputs including individual Country Reports, and a larger Global Synthesis Report.

### Objectives of the country consultations

- Facilitate a **top-down/bottom-up approach** for exploring global trends and focusing on country context
- Strengthen relationships between business, Government, the UN and civil society in a given country with the intention of identifying and prioritizing Goal 16-related issues and **promoting collective action** towards policy development and strategic partnerships.
