

MAKING GLOBAL GOALS LOCAL BUSINESS INDIA

Take Climate Action by Setting a Science Based Target

27 April 2017
15:15 – 18:00

The Science Based Targets Initiative - a partnership of CDP, UN Global Compact, World Resources Institute and WWF - promotes innovative approaches to set ambitious and meaningful corporate GHG reduction targets that are consistent with the goal of limiting global warming to less than 2°C compared to pre-industrial temperatures. The session will take a dive into what a science based target is, the business case for setting a science based target and the process of setting a target. We will hear experiences from business representatives who have set and are setting a science based target, followed by roundtable discussions on how to set and achieve science based targets.

Facilitator: Ms. Heidi Huusko, Senior Manager, UN Global Compact

Coffee served
