Pedro Faria, Strategic Advisor, CDP

Pedro Faria is a Strategic Advisor at CDP, where he advises CDP Executive Leadership Team on issues related to sustainability, climate and innovation. For 9 years he was CDP Technical Director leading the team which designs CDP questionnaires, CDP scoring methodologies and curates CDP data. He had the opportunity to collaborate and be at the inception of several CSR innovations: CDSB Framework; <IR> (integrated reporting); electronic sustainability standards (XBRL); science-based target methods; corporate renewable electricity procurement (Scope 2 guidance, RE100); and ACT project - Assessing low-Carbon transition.

He has 20 years of professional experience in the environmental field and has worked in the public and private sectors as well as with NGO's. He has authored or co-authored several reports and articles that have appeared in both general and specialized media as well as peer reviewed journals.
